

What factors affect the performance of the high-voltage battery in my plug-in hybrid? One important external factor influencing the performance and capacity of a battery is the temperature. As you probably know from your mobile phone battery, the performance is restricted in cold and hot temperatures.

Has anyone heard of confirmed reports of installing a 9kWh Fusion battery in a C-max Energi? (especially with links) I can imagine a bunch of different scenarios: The computer wouldn't know what to do with it, and freaks out. The computer assumes it's still 7kWh and doesn't use the full capacity. The software was written with capacity as a ...
