

Batteries are playing an ever-important role as electrification of transport increases. Today, most lithium-ion battery cells are supplied by Asian manufacturers. However, Europe has already picked up the pace in an attempt to play catch-up. Policymakers and industry representatives want to move away from reliance on imports and are ramping up production capacities. In part ...

Wholesale Lead-Acid Battery for PV systems Invented in 1859 by French physicist Gaston Planté, the lead-acid battery is the earliest type of rechargeable battery. In the charged state, the chemical energy of the lead-acid battery is stored in the potential difference between the pure lead on the negative side and the PbO₂ on the positive side, plus the aqueous sulphuric acid. The ...
