The Bank of America tower, for example, uses a series of tanks to freeze ice during the nighttime, when both the demand for and the cost of electricity are both at their lowest, said Solaripedia. The ice created and stored overnight is melted during the day and used to keep the entire building at a comfortable temperature.

The Ice Bank A model tanks are the first series of energy storage tanks introduced by CALMAC starting in 1979. These classic tanks are bullet proof reliable. The main distinctions are that A models have two inch flanges and unlike the C Models, each A model tank needs to be connected individually to distribution piping.

"We reviewed other ice storage companies for this school, but ultimately chose to work with CALMAC for this project because of the lower ambient temperature and higher efficiency of the air-cooled chillers while making ice at night. I have used CALMAC energy storage tanks in multiple designs and have always been very happy.
