

But scientists only know if solar maximum has happened six months after the event, because they use six months of data analysing the intensity and frequency of sun spots. Current predictions suggest we could reach solar maximum at the end of 2024 or early 2025. For More News And Analysis About Eswatini Follow Africa-Press

The development sits on 45 hectares (110 acres) of real estate, provided by the Eswatini government. [2] The power station is located in the town of Matsapha, in Manzini Region, in central Eswatini. The solar farm sits adjacent to the government-owned 15 megawatt Edwaleni Hydroelectric Power Station. [3] Matsapha is located approximately 8 kilometres (5 mi) west of ...
