

How will Ghana improve its electricity sector from 2010 to 2030?

A stronger foundation has been therefore set for further advancement in Ghana's electricity sector from 2010 up to the moment. The aim of the government is to increase the capacity of renewable energy continuously in electricity generation with 10% of the renewable energy in the country's energy mix by 2030 being a target.

How has Ghana established its energy sector?

The results show that the Ghana Government has established its energy sector based on the definition of the key targets in line with the world trend. Ghana is equipped with a vast quantity of renewable energy potentials which include hydropower, solar, wind, and bioenergy.

Why is the energy sector a problem for Ghana?

Long delays in payments by the government are a significant concern in Ghana's energy sector, as the subsidy comes from the national budget. Debt within the energy sector and the high cost of power in Ghana create a brake on Ghana's economic development.

What is the energy mix in Ghana?

The generation mix was dominated by 14 thermal plants that were installed, which accounts for almost 60% of the energy generation mix in Ghana. As at 2022, the shares of hydro and renewable plants were 39.9% and 0.3% respectively [26,27,28,29]. Energy mix in Ghana is relatively simple, though it has challenges.

Is nuclear power the next clean baseload option for Ghana?

Nuclear power has the advantage of greater security of supply and non-emission of Greenhouse Gases (GHGs). In Ghana's quest to improve upon energy security in the future, the energy sector has commenced the necessary steps of incorporating nuclear power as the next clean baseload option for the country.

Is solar energy a viable option in Ghana?

Ghana is a fertile ground for expanding renewable energy sector because of the abundance of the natural resources, geographical conditions and government policies which are favourable. The country is enjoying ample sunlight in the entire year and therefore solar energy is an option that is highly viable.
