

Does Hungary have a commitment to renewables?

Attila Steiner, Hungary's State Secretary for Energy and Climate Policy, said: "Hungary has a strong commitment to renewables. As the next step, the government's priority is to upgrade the national grid to be capable of integrating the rapidly growing electric capacity generated by weather-dependent energy sources."

Does Hungary have a strong energy transition?

Hungary has a strong starting point for its energy transition thanks to rapid growth of solar PV and a solid base of nuclear power. But it still has considerable work ahead to achieve its objectives for emissions reductions and energy sovereignty.

How much solar capacity does Hungary need?

Hungary has set a target of 12 GW of solar capacity by the start of the next decade. However, grid capacity shortfalls have been dire, hampering primarily the rollout of large-scale solar. The country's revised National Energy and Climate Plan envisages the construction of a total of 1 GW of storage capacity by 2030.

Where will Hungary's largest energy storage system be built?

With funds obtained through a previous program, transmission system operator MAVIR is already building the country's largest energy storage system - a 20 MW project in Szolnok, central Hungary, the ministry said. It added that several projects with even bigger capacity will be installed under the tender concluded a few days ago.

Can Hungary achieve more energy security and independence?

Hungary's transition to clean energy can enable it to achieve greater energy security and independence as it navigates the supply challenges that Russia's invasion of Ukraine has created for countries across Europe, according to a new in-depth policy review by the International Energy Agency.

How much energy does Hungary use in the year 2030?

According to estimates, Hungary's energy consumption in the year 2030 is expected to be 60 terawatt-hours (TWh). Traders and universal service providers sell imported and domestically produced natural gas to domestic users. Six regional distributor corporations - owned by three market players - oversee the natural gas distribution systems.
