Unsere neue RACLAN SQUARE Box.....die Lithium-Ionen-Batterien mit einer Kapazität von bis zu 3,5 kWh auf Schiffen oder unter rauen Bedingungen, wie z. B. in der Forstwirtschaft, auf Baustellen und im Verteidigungsdienst, sicher laden und lagern kann, ist eine noch nie dagewesene Option.

The RACLAN box is an active safety box for the safe charging and storage of lithium-ion batteries, which are commonly found in water toys onboard. The RACLAN box is fabricated from a high-tech composite material that is both waterproof, fire proof and explosion proof. The box is designed to store and charge batteries up to 3.5kWh.

San Francisco approved the RACLAN Box to help e-bike shop owners comply with new e-bike safety ordinances. The San Francisco Fire Code requires a fire barrier or battery cabinet when charging five or more battery packs -- a common occurrence in a place like a bike shop.. As an approved device, the RACLAN Box satisfies this requirement.

Our new RACLAN SQUARE Box offers users who need lithium-ion batteries with a capacity of up to 3.5 kWh on ships or in harsh conditions such as: in forestry, on construction sites and in the defense service, want to load and store safely, an ...

Introducing the Raclan Square Box - a cutting-edge solution engineered specifically for Li-Ion battery fires prevention, ensuring the utmost safety and security for your batteries. With dimensions of 580 x 580 x 400 mm (interior sizing at 540 x 540 x 230 mm), this box offers substantial space to accommodate batteries up to 3.0 kWh.

Raclan Box Rechargeable batteries and their chargers are placed into and plugged in within the box. The door is secured using the pivoted handle and the external power supply is turned on. The electronic system now monitors the charging process, the rechargeable battery status and the condition of the interior space. If the monitoring sensors [...]

Designed with utmost precision, the RACLAN box ensures the secure charging and storage of lithium-ion batteries. How It Works: Upon detecting any unusual spike in temperature within its confines, the RACLAN box promptly cuts off the charging and initiates the release of the TRIDENT extinguishing agent.

Diese müssen regelmäßig geladen und bei Nicht-Benutzung sicher verwahrt werden. Um beides sicher zu gewährleisten, wurde die RACLAN-Box entwickelt. Wiederaufladbare Batterien und ihre Ladegeräte werden in die Box eingelegt und eingesteckt. Die Tür wird mit dem Schwenkgriff gesichert und die externe Stromversorgung eingeschaltet.
