

Israel atrius energy

Why should you choose Atrius?

Reduce energy, embrace sustainability, unlock efficiency, and enhance experiences. Atrius transforms your building into an intelligent, responsive environment that benefits owners, operators, and occupants.

How can Atrius' energy help Weber State save money?

Automatically normalize data against weather or occupancy changes to compare building performance across locations. "Weber State has saved over \$2.3 million since 2020 using Atrius' Energy to identify, scope, and verify energy projects." Encourage occupants to reduce energy consumption by sharing dynamic storyboards across public screens.

What is Atrius & how does it work?

Atrius offers an extensive suite of apps that turn outdated buildings into intelligent spaces and reshape how people experience them. Enable your buildings to sense, think, and act. Part of the Intelligent Spaces Group at Acuity Brands.

How can Atrius help reduce energy consumption?

Encourage occupants to reduce energy consumption by sharing dynamic storyboards across public screens. "Atrius makes energy and emissions data readily accessible to faculty, students, and consultants who appreciate the intuitive, user-friendly format." Ready for a deeper dive?

How does Israel respond to electricity consumption forecasts?

The Government of Israel responds to electricity consumption forecasts by promoting several programs to reduce pollution and increase the use of natural gas and renewable energy.

What are the major energy projects in Israel?

Two major energy projects in Israel are: (1) the construction of a 600-900MW gas-fired combined cycle Sorek power plant that is currently in the review process of the pre-qualification stage, and (2) the privatization of Israel's largest power station, a 1693MW gas-fired Eshkol power plant.

Smart Energy Decisions deployed an online 19-question survey on behalf of Atrius to energy, facility, and sustainability leaders in various organizations across seven industries. The survey was completed by 247 respondents in September and October 2023.
