

Does Greece have a plan for rooftop solar PV?

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power capacity. However, there is no roadmap or strategy at this time in regards to rooftop solar PV in particular.

How will a new solar power project impact Greece?

In addition, the two projects will boost renewable energy production by 8 percent compared to 2020 levels. The storage units in both projects will help decouple electricity dispatch from production, thereby mitigating the intermittent nature of solar power and enhancing the stability of the Greek electricity grid, it added.

What is the FIT scheme for small Solar rooftop PVS?

FiT scheme for small solar rooftop PVs: a new program for small solar rooftop PVs (up to 6kWp) which was established in 2022 with a guaranteed price (of 0.087 Euros/kWh), for a 20 year contract. However, in general terms citizens have opted clearly to make more use of net metering and virtual net schemes instead of this program.

What is the penetration rate of smart meter in Greece?

Low smart meter penetration: Due to legal proceedings on a specific case with a Distribution System Operator (HEDNO), the installation of smart meters in Greece stalled and is only at a penetration rate of 6%. Although, this will be resolved with financial support from the European Investment Bank.
