

Will Mozambique achieve universal energy access by 2030?

By 2030, the Government of Mozambique hope to transform this landscape, and achieve universal energy access by the end of the decade. This would require capacity to more than double to almost 6,500 MW. Solar is undeniably the most intuitive renewable technology when it comes to off-grid energy solutions.

Will Mozambique get a solar power plant in 2023?

Future tenders are expected to be announced in Q4 of 2023, including the selection of two independent power producers for two 30 MW solar photovoltaic power plants and one 50 MW wind power plant. But Mozambique has an enormous challenge that spreads far beyond where the national grid ends.

Can Mozambique take full advantage of its solar potential?

In a new monthly column for [pv magazine](#), SolarPower Europe describes how Mozambique may take full advantage of its huge solar potential by implementing its recently launched Renewable Energy Auctions Programme for large-scale projects, while also pushing for more off-grid renewables in remote areas.

What energy sources are available in Mozambique?

Mozambique has abundant energy sources available for exploitation. As of 2021, the country was ranked first in energy potential of all the countries in the Southern African Power Pool (SAPP), with an estimated energy capacity of 187,000 MW. Available energy sources include coal, hydroelectricity, natural gas, solar energy and wind power.

How much power does Mozambique have?

As of 2019, Mozambique had 2,185 MW of installed hydroelectric generation capacity, accounting for 92 percent of total national installed capacity of 2,375 MW. The 2,075 megawatts Cahora Bassa Hydroelectric Power Station (CBHPS) across the Zambezi River, is the largest power station in Mozambique.

What is the market for off-grid solar in Mozambique?

The total estimated addressable market for off-grid solar is currently 173 MW, and is expected to grow in line with the growth of the aforementioned sectors. Recent energy policy reforms are also changing the game for off-grid renewables in Mozambique.

Overview
Solar energy Background
Hydroelectricity
Wind power
Oil and natural gas

Mozambique has a potential solar energy yield estimated between 1,785 and 2,206 kWh/m²/year, resulting in a solar energy potential of 23,000 GWh/year. In August 2019, the first grid-ready solar power station, the 40 megawatts Mocuba Solar Power Station, in Mocuba District, Zambezia Province, achieved commercial commissioning. Developed as a public-private partnership (PPP) project, it is co-owned by a European IPP, a Mozambican parastatal and a European financier.

Mozambique plans to move forward with solar power plants in at least five parts of the country by 2030, with an estimated capacity of 1,000 MegaWatts (MW) of electricity production, promising a "true solar revolution".

Mozambique has a potential solar energy yield estimated between 1,785 and 2,206 kWh/m²/year, resulting in a solar energy potential of 23,000GWh/year. [5] In August 2019, the first grid-ready solar power station, the 40 megawatts Mocuba Solar Power Station, in Mocuba District, Zambezia Province, achieved commercial

Through collaborating closely with state utility company EDM, Globeleq has built trust and delivered results in line with the country's energy transition goals. The inauguration of Mozambique's first independent power producer (IPP) solar power plant in Cuamba in 2023, which integrated a utility-scale battery storage system, also marked a ...

Large scale renewable projects are becoming a point of interest for investment in Mozambique, specifically solar and hydro. Mozambique's main body to promote renewable energy access, FUNAE, expects that the capacity of on-grid ...

We've been actively developing solar energy, starting with the Mocuba plant in 2018, followed by Metoro in 2022. Most recently, we launched the 15-MW Cuamba solar plant last September. The potential for renewables ...

We've been actively developing solar energy, starting with the Mocuba plant in 2018, followed by Metoro in 2022. Most recently, we launched the 15-MW Cuamba solar plant last September. The potential for renewables in Mozambique is vast, estimated at 23 TW.

By 2030, Mozambique aims to achieve universal electrification through on-grid and off-grid solutions while dramatically increasing its installed capacity through hydro, solar, wind and gas projects. Mozambique stands on the edge of a transformative era in power generation.

By 2030, the Government of Mozambique hope to transform this landscape, and achieve universal energy access by the end of the decade. This would require capacity to more than double to almost 6,500 MW. Solar is undeniably the most intuitive renewable technology when it comes to off-grid energy solutions.

Large scale renewable projects are becoming a point of interest for investment in Mozambique, specifically solar and hydro. Mozambique's main body to promote renewable energy access, FUNAE, expects that the capacity of on-grid renewable energy from independent power producers (IPP) will increase to 575 MW by 2030.

Mozambique's renewable energy landscape is in its infancy, with 60 MW of installed solar capacity in 2022. However, the Mozambican government have a vision for the country, based on clean ...

Mozambique energy independence solar

The inauguration of Mozambique's first independent power producer (IPP) solar power plant in Cuamba in 2023, which integrated a utility-scale battery storage system, also marked a major milestone for both the company and the country.

This report looks into the investments opportunities for solar deployment in Mozambique. The report focuses on the energy context, relevant actors and the regulatory framework for investments in renewables.
