Typical financial return and payback period for a 60kW Solar System. Over its 25-year lifespan, a 60kW Solar System can generate approximately \$624,150 of power based on \$.30c per kw. On a yearly basis, a 60kW commercial Solar System can generate approximately \$24,966.

The cost of a 10kW solar system in New Zealand can vary depending on several factors, so let's peel back the layers and explore what affects the price tag on your sunshine harvest. Size Does Matter First things first, let's talk about the size of your solar system.

Absolutely! New Zealand has abundant sunshine and generates between 1,700 and 2,100 sunshine hours annually. Some areas, like Nelson and Gisborne, receive as much as 2,400. Solar Panels don't require sunshine; they require daylight, so Solar Panels work year-round, even in the lower South Island.

Dunedin Solar use SunPower solar panels because we know their claims of reliability and performance are backed by real-world evidence. They boast a return rate of less than 0.005% based on over 15 million panels installed since 1985.
