

Oerlikon stationary batteries India

Who makes Oerlikon stationary batteries?

Oerlikon Stationary Batteries Ltd. manufactures a full range of stationary lead-acid batteries, notably the valve-regulated Compact-Power(TM) family which has become a key component in telecom power equipment and a whole variety of other applications.

What are Oerlikon evolution batteries?

Oerlikon evolution batteries are valve-regulated gas recombination batteries with gelled electrolyte- well suited for use in forklift trucks, pallet trucks, electric vehicles and automatic transport systems.

Is Oerlikon battery a good brand?

"Oerlikon Battery has a very good reputation with a respected range of well designed products being furnished into high integrity applications in telecom, utilities, rail, and material handling as well as other sectors," said Raymond Kubis, president, EnerSys Europe.

Is EnerSys buying Oerlikon batteries?

EnerSys will acquire the stock of OEB Traction Batteries Inc. and the operating assets and liabilities of Oerlikon Stationary Batteries Inc., along with its Swedish sales subsidiary. The companies, which operate under the name Oerlikon Battery, have combined revenues in excess of \$50 million per year.

What happens to Oerlikon battery?

The companies, which operate under the name Oerlikon Battery, have combined revenues in excess of \$50 million per year. All employees of these entities as well as some Accu Holding employees will be transferred to EnerSys.

What are the advantages of Oerlikon High Frequency smart chargers?

Very low gas emission permits decentralized charging use of a simplified charging room possible. Bolt-on, halogen-free connectors facilitate easier cell replacement. Recharging time is significantly reduced when using Oerlikon high frequency smart chargers: 8 hours at 60% Depth of Discharge (DOD); 12 hours at 80% DOD/C5.

The Oerlikon evolution is a new valve regulated gas recombination battery with gelled electrolyte, accepting up to 80% DOD/C 5. This range is suitable for use in materials handling equipment in low to medium duty applications. The cells have an enhanced capacity compared to most other maintenance free batteries on the market. In combi-

Profile: Oerlikon Stationary Batteries Ltd. manufactures VRLA/AGM stationary batteries for medical applications. We offer a wide range of maintenance-free batteries from 25 Ah to 3000 Ah and low maintenance OPzS/OPzV open vented stationary batteries.

Oerlikon stationary batteries India

Oerlikon Stationary Batteries Ltd. manufactures a full range of stationary lead-acid batteries, notably the valve-regulated Compact-Power& trade; family which has become a key component in telecom power equipment and a whole variety of other applications.

The successful operation of stationary lead-acid batteries of the VRLA/AGM type at cold and extremely cold temperatures is a precondition for the further expansion of their application envelope. Application oriented tests and investigations show a surprisingly robust behavior of such batteries under temperature conditions as low as -30 °C.

Oerlikon's evolution batteries are valve-regulated gas recombination batteries with gelled electrolyte - well suited for use in forklift trucks, pallet trucks, electric vehicles and automatic transport systems. Virtually maintenance-free, reduced charging time, high energy efficiency and cost savings make Oerlikon evolution batteries an ...

Energys will acquire the stock of OEB Traction Batteries Inc. and the operating assets and liabilities of Oerlikon Stationary Batteries Inc., along with its Swedish sales subsidiary. The companies, which operate under the name Oerlikon Battery, have combined revenues in excess of \$50 million per year.
