As the popularity of electric vehicles (EVs) and smart grids continues to rise, so does the demand for batteries. Within the landscape of battery-powered energy storage systems, the battery management system (BMS) is crucial. It provides key functions such as battery state estimation (including state of charge, state of health,

battery safety, and thermal management) ...

The Oman Investment Authority has made an undisclosed investment in the US-based electric vehicle battery start-up, Our Next Energy (One). This move is in line with Oman's commitment to achieving net-zero emissions by 2050.

EZA Compact Lithium BatteriesAt the centre of what leading French producer and manufacturer EZA does is the range of ENERGY lithium batteries, which provide superior performances to users who have high demands for comfort. Their metal casing has been specially designed to enable ideal installation of prismatic and electronic cells for the safety and reliability [...]

CATL, the world's biggest battery manufacturer, just unveiled TENER, a new energy storage system for utility companies. TENER is as big as a standard 20-foot shipping container and has a capacity of 6.25 MWh.

Significantly, battery energy storage will account for 28 megawatts (MW) of the total 146 MW of new solar PV - diesel hybrid capacity that will be developed as part of the IPP. Solar PV capacity will account for another 48 megawatts-peak (MWp), while the balance 70 MW will comprise diesel generation capacity.
