This is a testament to the company's resilience and commitment to renewable energy, even in the face of adversity. "The 500 MW target by 2030 is overdue--Palestine needed this capacity years ago," Hijawi stressed, highlighting the urgency of scaling up renewable energy infrastructure.

its energy needs. The 2015 Renewable Energy and Natural Resources Law came into effect to promote the exploitation and development of renewable sources, and to increase the proportion of its contribution to total energy mix, and also regulates the power purchase agreements with carriers. The Government had set the energy sector strategy

The two most viable options for renewable energy in Palestine are solar and geothermal energy. With over 300 days of steady sunshine a year, residents of Gaza and the West Bank have increasingly turned towards solar energy as a way to power small, everyday appliances, such as electric fans and other forms of air conditioning.

meeting energy demand and discussed the challenges facing the Palestinian energy sector. His study showed that the main renewable energy sources in Palestine are solar, wind, biomass and geothermal. These energy sources may significantly decrease the reliance on neighboring coun-tries and improve Palestine's access to energy.

BP and Azeri national oil company Socar have taken part for the first time in an Israeli licencing round for natural gas exploration, the latest sign of growing international interest in the ...
