Why does the Philippines invest in geothermal power plants?

In balance, it also continues to invest in thermal power plants to support the country's baseload and peak energy demands. As the world continues to find ways to harness clean, sustainable energy, the PH boasts one of its most powerful resources: geothermal.

Why is geothermal energy so expensive in the Philippines?

Despite this advantage, geothermal energy only accounts for 9 percent of the Philippines' gross power generation, compared to coal's dominant 63 percent. The reason? High upfront costs, high exploration risks, and technical challenges in drilling wells, with exploration alone eating up almost half of total project costs.

Where are Cleantech's solar projects located?

of Renewable Energy Projects by 2025. The 22.0 MW SIAEC plant is located in San Ildefonso, Bulacan, and is CleanTech's second solar project in the area. The 20.0 MW farm located in San Barbara, Pangasinan is CleanTech's solar farm under the OneManaoagSolar Corp., a CleanTech subsidiary. Leading the way to a sustainable future.

Does the Philippines have geothermal energy?

TIWI, ALBAY, Philippines -- As the world continues to find better ways to harness clean, sustainable energy, the Philippines, quite literally, stands on one of its most powerful resources: geothermal energy.

How big is geothermal demand in the Philippines?

"With the Philippines' installed geothermal capacity at 1,952 megawatts as of April 2024, there is still significant room for growth." Peak demand in the Philippines continues to grow annually, with forecasts indicating it will double within the next 13 years to over 36,000 megawatts by 2037.
