

Approximately 6% of primary energy in French Polynesia is generated from renewable energy sources. [1]
Approximately 30% of electricity is generated renewably, primarily Hydroelectricity and solar power. [1]
Renewable generation is concentrated on Tahiti, with other parts of French Polynesia almost entirely reliant on fossil fuels. [2]

mix in French Polynesia. It is the first renewable energy source in French Polynesia with an installed capacity of 49.3 MW. The photovoltaic sector is expanding from 4.7 GWh in 2010 to 40 GWh in 2019. It now accounts for 5.8% of the electricity mix in French Polynesia. Installed capacity is 41.1 MWp in 2019. 28.8%

Annual generation per unit of installed PV capacity (MWh/kWp) 10.5 tC/ha/yr Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a ...

Explore the solar photovoltaic (PV) potential across 2 locations in French Polynesia, from Pirae to Papeete. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV potential and identify the optimal panel tilt ...

In Papeete, French Polynesia (latitude: -17.5324608, longitude: -149.5677151), solar photovoltaic (PV) generation is highly suitable due to the abundant and consistent sunlight throughout most of the year. The average daily energy ...

SMA Solar Technology AG and its subsidiary SMA Sunbelt Energy GmbH have installed French Polynesia's s first integrated PV-plus-storage project. The project features an output of more than 1MW on the island of Tetiaroa, with 60% of the island's electricity demand covered following the completion of the installation.

How to integrate PV+storage production (safe and stable operations)? 12/8/5 hours ahead PV+storage production forecasts, updated every 6 hours (trapezoidal power profile provided by plant operators)

How to integrate PV+storage production (safe and stable operations)? 12/8/5 hours ahead PV+storage production forecasts, updated every 6 hours (trapezoidal power profile provided ...

Photovoltaics in French Polynesia

Perfect conditions for a large-scale stand-alone grid: the Reao atoll in French Polynesia is located in the middle of the South Pacific, 1 350 kilometers away from Tahiti. Each day the 324 inhabitants need around 250 liters of diesel to produce electricity. The energy is ...

In Papeete, French Polynesia (latitude: -17.5324608, longitude: -149.5677151), solar photovoltaic (PV) generation is highly suitable due to the abundant and consistent sunlight throughout most of the year. The average daily energy production per kW of installed solar capacity varies by season, with 7.16 kWh in Summer, 5.81 kWh in Autumn, 4.77 ...
