As of Dec 2024, the average cost of solar panels in San Juan is \$2.80 per watt making a typical 6000 watt (6 kW) solar system \$16,807 before the federal solar credit and \$11,765 after claiming the federal solar tax credit. ...

Solar panels are only worth it if you have enough money to pay costs upfront. Financing is not worth it. Some would argue that QoL on not having to do maintenance yourself is "worth" the price hikes, but considering that anyone capable of climbing up a roof should be able to do the amount of work those companies will ever do (ie clean up panels every now and then)...
