

Does Romania need a strong renewables supply chain?

The EU, including Romania, needs to develop a strong renewables supply chain in order to avoid having to rely on imports from third countries. Recognizing the status of wind energy as a sector of strategic importance is key.

Will Romania achieve a decarbonised energy sector by 2040?

In contrast, the investments outlined in Romania's National Energy and Climate Plan (NECP) do not ensure a decarbonised energy sector by 2040. The Romanian power sector would emit 9.2 MtCO₂ in 2030 (which can be halved in a lower-gas scenario) and 3.5 MtCO₂ in 2040, at slightly higher wholesale electricity prices.

How much money does Romania get from the EU modernization fund?

In 2022, Romania received 1.4 billion Euro from the EU Modernization Fund for transition towards clean energy. The amount will cover construction of new eight solar parks and two electric power plants with gas turbines in combined cycle, to replace lignite with renewable sources and gas.

Is Romania a good country for photovoltaic and onshore wind energy permitting?

Romania's current performance with regards to photovoltaic and onshore wind energy permitting must be improved. It is indicated that the permitting process in Romania takes significantly longer than the RED II limits. The prolonged duration of permitting is caused by barriers within the underlying legislation.

Does Romania have a competitive advantage in wind production?

Romania appears to have a regional competitive advantage in wind production. The market value of wind remains higher than that of solar for all modelled years, while lower wind investments are expected in Hungary and Bulgaria.

How can Romania improve its economy?

Significant resources (financial, technical, human) are required to install new capacities which Romania does not currently have. The production of components for wind turbines or PV panels, software or storage equipment constitutes a possible course of action. This can contribute to the development of the country's economy.

Hitachi Energy, a global technology leader that is advancing a sustainable energy future for all, announced today that it has acquired a controlling stake of Eks Energy, a leading supplier of power electronics and energy management solutions for storage and renewables integration, based in Seville, Spain, from Powin LLC (Powin), a top global energy ...
