Will Russia build a lithium battery factory in 2025?

Russian nuclear energy giant Rosatom has acquired a 49% stake in Enertech International, a South Korean lithium-ion battery specialist, and has announced plans to build a gigafactory at an unspecified location in Russia. The start of production is scheduled for 2025.

Where is Russia's new lithium-ion battery manufacturing facility located?

Russian state-owned Rosatom State Nuclear Energy (Rosatom) has announced it will build its 3 GWh lithium-ion battery manufacturing facility in Kaliningrad, in Russia's province of the same name, sandwiched between Poland and Lithuania along the Baltic coast.

Will Russia become the first country to produce lithium ion batteries?

It aims to become Russia's first-ever domestic producer of lithium-bearing raw materials and eventually build full local production of lithium-ion batteries. The project was originally expected to reach full annual production capacity of 45,000 metric tons of lithium carbonate and hydroxide by 2030.

What are Russian batteries made of?

Their key component is a battery made from nickel, cobalt, manganese, copper, aluminum, and, of course, lithium-- metals that are now called 'battery metals.' Russia is fully self-sufficient in nickel, cobalt, copper, and aluminum; manganese is imported from several sources, and only lithium is yet a major concern.

Will Russia produce a prototype battery by the middle of the year?

The move follows Russia's claim last month that it will have produced prototype batteries by the middle of the year.

Will Russia have a lithium mining project?

Thus, within a few years, Russia may have a large mining project that will fully -- and even abundantly -- meet its current domestic demand for lithium. According to Rockwood Lithium, one of the world's key lithium producers, a 25 kWh car battery needs 44 pounds (almost 20 kg) of lithium carbonate.
