

How can a new energy system be made in R  union?

This includes replacing sugar cane with different food crops; restricting urbanization; increasing the capacity for producing energy from waste; significantly scaling up photovoltaicsthat convert sunlight directly into energy; and convincing R  union islanders to make certain lifestyle changes.

Is electricity self-sufficiency possible on R  union?

Although electricity self-sufficiency on R  union is theoretically possible,there are still a number of constraints imposed by factors such as nature,technology and economics. The island's remote location and geographical features are serious challenges for starters.

Will switching to renewables solve R  union's self-sufficiency problem?

Although laudable,switching to renewables will notsolve the self-sufficiency problem. The renewable sources R  union uses to generate electricity will still be mainly imported from abroad. "Forests will be cut in Canada to put in our furnaces in R  union island," says Mathieu David,who studies mechanics and energy at the University of La R  union.

Why is R  union so worried about energy imports?

Part of this concern stemmed from R  union's over-reliance on imports,including for energy,says Russeil,who is now at the French National Research Institute for Agriculture,Food and Environment in Paris.

Could R  union be the first region to send food and energy?

"If there's climate-change problems,or war,or any political conflict in the world,R  union wouldn'tbe the first region where people would think to send food or energy," says Jean Philippe Praene,who studies renewable energy at the University of La R  union in Saint Denis. "So we have to be as self-sufficient as possible."

What technology is needed for R  union?

Wave energy is another option, but leading technologies from Australia and the United Kingdom are not suited for the sea conditions and industrial support found at R  union. Bespoke solutions will be needed to tailor these kinds of technology for the island.

D  couvrez comment Akuo Energy met en avant l'Agrinergie® à la R  union dans le film "Demain" de M  lanie Laurent et Cyril Dion. Sortie le 2 D  cembre, ce film documentaire met en lumi  re les solutions innovantes pour lutter contre le changement climatique.
