

What are the energy accounts for Samoa?

1. Introduction This publication is the 2nd Energy Accounts ever produced, following the compilation of the first Experimental Energy Account for Samoa using the 2016 Samoa Energy Review by the Ministry of Finance. The Energy Accounts 2020 presents estimates on physical supply and use of energy (in joules¹) for Samoa.

What are the energy supply and use components for Samoa in 2020?

Table 1 is a summary of the Energy Supply and Use components for Samoa in 2020. Samoa's energy supply totaled approximately 5,282 TJ where imported energy products accounted for an estimated 69.8 % (3,689 TJ) of total supply while natural inputs from the environment accounted for the remaining 30.2 % (1,593 TJ). Source: SBS, 2022.

What is Samoa's energy plan?

to energy development. The plan will address Samoa's energy issues, promote sustainable energy development, ensure long-term energy security, economic growth, and enhance energy efficiency to reduce the country's dependence on fossil fuels, minimize environmental impact, and create new opportunities for innovation, em

What are the energy issues faced by Samoa's energy sector?

all energy stakeholders. The Plan will report on the energy issues faced by Samoa's energy sector, which includes high energy costs, dependence on imported fossil fuels, limited access to energy services in rural areas, and institutional capacity constraints to manag

Could Samoa's electricity system Go Green?

The future of Samoa's electricity system could go green,a University of Otago study has shown. Pacific Island nations are particularly susceptible to climate change and face high costs and energy security issues from imported fossil fuels. For these reasons many Pacific Island nations have developed ambitious 100 per cent renewable energy targets.

How much does electricity cost in Samoa?

Average U.S. and American Samoa Electricity Prices (2022) ASPA rates are down slightly as of January 2024--approximately \$0.41/kWhfor residential and commercial customers and \$0.38/kWh for industrial customers. ASPA's total energy rates include a renewable energy flat rate charged at \$0.002/kWh across all service types (ASPA 2024).
