In 1991, BNP Nouvelle-Calédonie, a subsidiary of BNP Paribas, established a subsidiary, Banque de Wallis-et-Futuna, in the territory. Two years earlier Banque Indosuez had closed its branch at Mata-Utu, leaving the territory without any bank. Following this, the Bank of Wallis-and-Futuna (BWF) with its head office in Wallis was created in 1991.

LHE12D intended to measure grid parameters, e.g. active energy, reactive energy, voltage, current, power, power factor and frequency. The RS485 interface provides power monitoring data for inverters and other devices to realize fast response control.

Una de las principales diferencias de las redes eléctricas inteligentes respecto a la red eléctrica tradicional es que el sistema smart grid es bidireccional, es decir, transmite la electricidad en ambos sentidos esta manera, tanto los ...

The smart grid is revolutionizing electricity production and consumption. However, strategic use of ICTs and the Internet in energy innovation requires clarifying the roles of partners coming from distinct industries. And it begs for greater coordination of government departments and stakeholder communities that so far had unrelated competencies.

The integration of sensors and monitoring devices across the grid infrastructure is central to smart grid systems. These sensors continuously collect data on various parameters such as temperature, humidity, wind speed and power flow. This real-time information enables the smart grid to anticipate and respond swiftly to weather-related challenges.

The development of smart grids promises to give consumers more control over their energy bills, as well as encouraging small-scale home-based renewable energy installations. But how do customers feel about smart grids, and how are they impacting ratepayers' relationships with their utilities? To find out, we speak to Patty Durand, president and CEO of ...
