

Where does solar energy come from in Syria?

The use of solar energy spreads from northwestern Syria, which started relying on solar power around 2016, passing through areas in the north-east, ending with the areas under the control of the Syrian regime, which directed a clear trend to generate electricity through them, not only in large industrial facilities but even in homes.

Is Syria a good country for solar energy?

Regarding wind energy, which is the second source of energy, Syria is not considered one of the countries that have a sufficient amount of wind throughout the year to produce electricity, and therefore the solar energy situation is regarded as the best in it.

Are solar panels a viable alternative energy source in Syria?

As an option that seemed to be one of the best alternative energy sources in Syria, reinforced by the absence of fuel, the spread of solar panels began in most regions, respectively, years ago, amid "government" support and adoption of this trend.

Are solar panels a better option than losing electricity in Syria?

According to an opinion poll conducted by Enab Baladi, a number of Syrians residing in various governorates considered that alternative energy through solar panels is a better option than losing electricity despite its high costs and regardless of the controlling parties.

Why are solar panels so popular in Syria?

From the rebel-held northwest to government-controlled areas, solar panels have become common in Syria, providing power for homes, public institutions and even camps for the displaced.

Is there a solar revolution in Syria?

An unlikely solar revolution of sorts has taken off in an embattled, rebel-controlled pocket of northwestern Syria, where large numbers of people whose lives have been upended by the country's 10-year-old civil war have embraced the sun's energy simply because it is the cheapest source of electricity around.

DAMASCUS: Facing crippling electricity cuts, Syrian dentist Ibrahim al-Akzam has turned to solar power to keep his Damascus clinic going, a reflection of the deep energy crisis in his country...

UOSSM launches the second "Syria Solar" project at Arkabat Hospital on July 16, 2019, with the support of the Idlib Health Directorate. The hospital is one of the key hospitals in Northern Syria, specializing in orthopaedics. UOSSM installed 300 solar photovoltaic panels and 12 inverters with a capacity of 90 kWp DC power, 216 batteries ...

Solar life Syria

Solar resource (GHI, DNI, DIF, GTI, OPTA), PV power potential (PVOUT) and other parameters are provided in the form of raster (gridded) data in two formats: GeoTIFF and AAIGRID (Esri ASCII Grid). Provided data layers are in a geographic spatial reference (). Metadata is provided in PDF and XML format for each data layer in a download file (according to ISO ...
