

Who owns a commercial silo in South Africa?

In South Africa there are three major commercial silo owners, namely Afgri, NWK and Senwes, who own 73% of the available storage capacity within the national grain storage market. Other important players are VKB and Suidwes. Capacity is by no means the only factor that determines the ability or effectiveness of the grain storage industry.

What is South Africa's energy crisis?

South Africa's energy crisis or load shedding is an ongoing period of widespread national blackouts of electricity supply.

Does South Africa have a power system?

South Africa is caught in an energy bind. From sunlight to wind and biomass, the country has an abundance of resources to generate renewable energy. But the nation's power system is still largely reliant on fossil-fuel power plants, with scheduled power outages being the norm -- until recently.

How will the energy transition affect South Africa?

Properly managed, the energy transition will benefit all. Renewable energy production will make electricity cheaper and more dependable, and will allow our industries to remain globally competitive. Investments in electric vehicles and hydrogen will equip South Africa to meet the global clean energy future.

Why should South Africa Invest in electric vehicles & hydrogen?

Investments in electric vehicles and hydrogen will equip South Africa to meet the global clean energy future. We will be able to expand our mining industry in strategic minerals that are crucial for clean energy, like platinum, vanadium, cobalt, copper, manganese and lithium.

Why does South Africa need more collaboration with consumers?

More collaboration with consumers is also needed to better understand how, and when, they use electricity. South Africa's energy crisis began in around 2007, when Eskom became unable to meet the country's energy needs and had to implement power cuts to decrease demand on the energy system.

As an official dealer of the well-known brand GSI®; The GSI Group South Africa (Pty) Ltd is situated in Johannesburg, a leader in Grain Storage, Drying & Conditioning, Handling Equipment, and Structures sales in Southern Africa. ...
