

Constructed on land leased from the Taiwan government, this floating solar project not only expands the nation's renewable energy infrastructure but also strengthens Taiwan's position on the global stage as a pioneer in innovative floating solar technology.

This involved adding in an additional 192 MWac of power generation, making the combined project an aggregated capacity of 373 MWac, which is currently the largest offshore floating solar project in the world.

Driving Taiwan's Energy Transition

Nuclear-free homeland: A decentralized system for self-generation and self-consumption of clean energy will move Taiwan steadily toward its objective of becoming nuclear-free.. ? Stable electricity supply: Most solar-powered energy is produced during noontime hours, which helps meet peak power demand.
