

Where will New Zealand's energy investment come from?

Some of the investment is expected to come from government-owned companies. New Zealand's electricity grid already runs off about 82% renewable energy after it dammed rivers decades ago to produce hydroelectric power. The government said it aims to reach 100% renewable generation by the end of this decade.

What is energy in New Zealand 2023?

Released today, Energy in New Zealand 2023 is MBIE's annual round-up of the energy sector, highlighting key trends in energy supply, transformation and demand for the 2022 calendar year. "High rainfall topped up New Zealand's hydro lakes over the winter months, making hydro a major contributor to renewable generation.

How does New Zealand meet its energy needs?

New Zealand relies on a combination of domestically produced and imported fuel to meet its energy needs. A common metric used internationally to measure this is a self-sufficiency indicator, which shows how well we can meet our own energy supply needs through domestic production.

What is primary energy consumption in New Zealand?

Graphic shows primary energy consumption in New Zealand for the 2021 calendar year (source: MBIE). Primary energy is energy that is harvested directly from natural resources - these can be renewable energy sources (as explored in this page) or non-renewable (such as gas, oil and coal).

What is a total primary energy supply in New Zealand?

Total primary energy supply: The total amount of energy available for use in New Zealand, accounting for domestic production and trade. Total final consumption: Energy consumed by end-users such as factories and businesses. The share of renewables in total primary energy supply fell slightly, down 0.7 percentage points to 42.8 per cent.

What is New Zealand's energy supply like in 2022?

Mike Hayward said. Energy supply from renewables reached 44% in 2022, building off last year's record high of 40.8%. This is the highest since reporting started in 1990. The closure of Marsden Point Oil Refinery in 2022 also saw New Zealand increase imports of refined oil products like petrol, diesel, and aviation fuel.
