Welcome to Tinia, an innovative technology company focused on developing solutions that promote sustainability, efficiency, and resilience in the energy industry. Our vision is to create a more sustainable and resilient energy system that benefits everyone.

By using Tinia's platform, local communities can create their own microgrids, which can include a combination of renewable energy sources such as solar panels and wind turbines. These microgrids can then be connected to the larger energy grid, allowing them to export any excess energy they produce and import energy when needed.
