Having a solar PV system means you could reduce your demand for electricity from the grid, as you put the sun's energy to work for you. You could see savings in your electricity costs, especially if you can shift more of your electricity use to the sunniest parts of the day when your solar system is generating electricity.

Morocco has already installed three large wind farms and two solar farms in Western Sahara, all hooked up to the Moroccan grid. The largest wind farm, comprising 56 giant turbines erected onshore by a Scottish company close to the coastal fishing village of Aftissat, is now to be doubled in size to more than 400 megawatts, following an ...

on occupied land in Western Sahara. Morocco increasingly tenders renewable plants in occupied Western Sahara as part of package deals that lump them in with similar projects in Morocco proper. The construction of the first phases of large solar plants in Boujdour and El Aaiún were for instance part of a contract
