Where is myenergi based?

Myenergi was founded in the UK in 2016 and is based in Lincolnshire, UK. The first Zappi charger was created in 2017 with the modified Zappi 2 being launched in 2019. I have quite a soft spot for the CEO Jordan Brompton she is quite a whirlwind and is always innovating and looking for ways to improve the company.

As @mcsmik says, you can turn off smart-charging - in the account settings ("face" icon in Octopus app). When off, it's easier to turn back on in the usual devices tab. Octopus T&C's seem to say you must use smart charging at least once in a 30 day period, or risk being thrown off the tariff.

We have set the Zappi to Eco+ mode in the app (Eco+ with two leaves on the Zappi screen itself) and the slider for the percent of green energy to 90% so it will use mainly solar and only a little from the grid. The Zappi had firmware v3.147 so the below is on this older firmware. This evening I have updated it to the latest

Zappi myenergi U S Virgin Islands

on the website v3.162.

Furthermore, zappi features intelligent car charging capabilities, with app integration that allows you to monitor and control your charging sessions from your smartphone. To top it off, zappi comes with a 3-year warranty, providing peace of mind and support for any potential issues that may arise. Get your zappi The zappi warranty

Can anyone help, we've switched to an ev energy tariff overnight but however we set the zappi in the myenergi app or online account it doesn't charge at the times we set it. I've set up account and registered the car, tried setting from eco+ schedule section in online account and app (clearing old schedule in between). ...

That is why we have personally handpicked some of the best myenergi-approved and trained installers in our network.

additional support for 3 phase systems, allowing connection of a single phase zappi in a 3-phase 3-wire supply, and to allow the ECO+ mode to be used on a three-phase zappi with all three phases energised. The way i read it, this allows the Zappi 1 to be able to be used with 3-phases, which is not possible. <Confused> Richard

In this mode Zappi will not charge. This includes Boost Timers. ECO+ Plug-In Charge? option When set, the zappi will do a short charge at max allowed PWM. The duration of the charge can be adjusted up to 30 seconds This feature was introduce on zappi 2 in an attempt to sort out charging problems with the VW e-Golf and the Tesla Model 3.

Method: Firstly, install a Myenergi CT clamp around the battery connection and set the Zappi to not drain the battery (Supply Grid -> Network Settings -> Battery -> Avoid ...

The skill is called My Zappi and you can find it in the Alexa skill store. ... I copied the serial number of my Zappi from my Myenergi Product screen and pasted it to the Amazon screen followed by the API Key. The Amazon screen would not accept what I had just copied over, so I generated another API key and tried again.
